

JOINT TAPE

INTACT Joint tape is a reinforcing material designed for treating joints, corners and minor cracks in gypsum plasterboard systems. It is embedded into the jointing compound to strengthen board joints, reduce cracking and provide a smooth, continuous surface ready for painting or decoration.

PRODUCT SPECIFICATIONS

Product	Gypsum board joint tape
Material	Fibreglass mesh
Color	White
Standard widths	50 mm
Alkali resistance	Good
Moisture resistance	Good
Application	Gypsum board joints and crack reinforcement
Installation method	Self-adhered and covered with jointing compound
Suitable environment	Dry internal applications

*Confirm the exact size against the approved INTACT product schedule before use.

KEY FEATURES

- ✓ Self-adhesive backing for quick application
- ✓ Strong fibreglass mesh construction
- ✓ Helps reduce cracking at plasterboard joints
- ✓ Open-weave structure allows jointing compound penetration
- ✓ Easy to cut and apply
- ✓ Resistant to stretching and shrinking
- ✓ Suitable for new construction and repair work
- ✓ Provides additional reinforcement around joints and cracks
