

UNIVERSAL BRACKET

INTACT universal bracket is a perforated galvanized steel accessory used to connect compatible metal framing profiles to the supporting wall or ceiling structure. Its adjustable arms help align the framing and accommodate the required stand-off distance.

PRODUCT SPECIFICATIONS

Product	Universal Bracket
Material	Galvanized steel
Surface finish	Zinc-coated, metallic silver-grey
Thickness	0.80 mm
Design	Perforated strip formed into a U-shaped bracket during installation
Application	Gypsum board wall lining and compatible direct-fixed ceiling systems
Function	Connects framing profiles to the substrate and allows alignment adjustment
Fixing arrangement	Base fixed to the substrate using suitable anchors; arms secured to the profile using specified metal screws

*Confirm the exact size against the approved INTACT product schedule before use.

KEY FEATURES

- ✓ Perforated arms provide multiple fixing positions.
- ✓ Adjustable form assists framing alignment.
- ✓ Galvanized finish provides corrosion protection.
- ✓ Suitable for concealed installation behind gypsum boards.

STORAGE & HANDLING

Store in a dry, covered and well-ventilated area. Protect the screws from moisture, chemicals and direct exposure to weather to prevent corrosion.
